

GIOVANNI HANZ GUINO

BSIT Graduate

PROFESSIONAL SUMMARY

I'm Giovanni Hanz Guino, a BSIT graduate with Cum Laude honors. I specialize in web application development using PHP (Laravel & CodeIgniter), HTML, CSS, and have solid experience in MySQL database systems. I build responsive, user-friendly, and data-driven systems, with a focus on clean code and efficient performance. Passionate about full-stack development and continuous learning.

INTERNSHIP AND THESIS PROJECTS

1. Web-Based Systems Development

Developed two full-stack web applications as part of internship and thesis requirements, utilizing the following technologies:

- PHP (Laravel & CodeIgniter Framework)
- HTML, CSS, JavaScript
- MySQL Database

Projects:

- Dean's Office System – A management system designed to streamline administrative tasks within the Dean's office.
- Integrated Extension Services Management System – A platform for managing and monitoring extension service programs and activities.
- Library Management System for the College of Engineering – A system to manage book inventory, borrowing records, and user accounts within the engineering college library.
