PROFESSIONAL SUMMARY

Detail-oriented IT professional with a Bachelor's Degree in Information Technology and extensive experience in full-stack development. Proficient in modern web technologies and passionate about delivering high-performance, user-friendly applications.

OJT EXPERIENCE

EVSU

2023-2024

IT Staff

- Engineered a web system for the EVSU iESMS, streamlining the submission of PPAs from satellite campuses, improving approval and tracking times by ~40%.
- Developed an efficient web process for the Dean's Office, replacing physical file management with automated notification reminders, enhancing staff compliance by 30%.
- Served as the primary point of contact at the front desk, directly assisting EVSU students with their inquiries, resolving issues efficiently, and guiding them to appropriate campus resources.
- Handled core administrative tasks for EVSU using MS Office (Word/Excel), while leveraging PowerPoint and Canva to design professional presentation decks, event brochures, and promotional materials.

Freelance

2025-2026

Full Stack Developer

- Developed 'Anawahay National High School's Story Stream', an interactive digital publication platform that increased student engagement in academia.
- Utilized Luma Framework to build a user-friendly interface, allowing real-time updates and publication of various content types.
- Implemented responsive design principles ensuring accessibility on multiple devices, enhancing the user experience for over 400 users.
- Integrated a robust backend with MySQL for efficient data management and retrieval, accelerating content updates by ~50%.
- Conducted project testing and user feedback sessions, resulting in a 20% increase in functionality based on user suggestions.

PROJECTS

Personal Portfolio Website

Full Stack Developer

vann-portfolio.netlify.app

- Built a modern, responsive portfolio using React and Tailwind CSS, showcasing technical skills and notable projects.
- Implemented smooth animations and interactive UI components, enhancing the overall user engagement.
- Optimized site performance for fast loading times, reducing load time by ~30% and improving user retention.

Sip Mobile Bar

Full Stack Developer

- Created a mobile-responsive application using Vue.js and Supabase, enhancing user interaction through real-time updates.
- Developed an inquiry system for event catering, increasing bookings by improving user accessibility.
- Employed Tailwind CSS for a clean and modern aesthetic, resulting in heightened user satisfaction.

Amo Na: Grocery Tracker App with Budgeting

Full Stack Developer

- Designed and developed an offline-capable grocery tracker app using React Native, tailored for Filipino households.
- Focused on user privacy and simplicity in budgeting functionalities, streamlining grocery planning and management.
- Incorporated a Waraynon-inspired aesthetic to enhance cultural relevance, attracting local users.
